## Clipping Path

When talking about a beautiful and crisp picture, nothing is more important than having the best clipping path or "deep etch." Nobody wants to see the background of a picture and it is some unnecessary material that takes away from the picture itself. Customers want to view a product, nothing more. Here at Color Experts India, we have a group of professional editors in our Clipping Path Service department who have exquisite talent and are more than willing to help you at a fantastic price and in a timely manner.

Attention to detail is incredibly important in a successful clipping path or "deep etch." Here at Color Experts India, our attention to detail is unmatched. Every minute edge that has to do with a "deep etch" is hand drawn at our Clipping Path Service department. Every clipping path or "deep etch" is hand drawn using Photoshop Pen Tool to make 100% sure your product and its edges look the best as possible.

## **Background Removal**

The importance of an image having a white background instead of a regular cluttered one is substantial. A recent survey even assigned a percentage to the number of customers who prefer their background to be white and that number is 44%. The biggest problem regarding white backgrounds is that many people just don't have the time to change the backgrounds of all their photos. Many people are enamored with the everyday tasks of regular life: working, taking care of bills and children. People just don't have the time to edit their photos, especially when it's a large group of photos that is precisely the reason our company Color Experts India was created.

When selling a product on any site especially any of the major players such as Amazon, it is a necessity to have clean, white backgrounds on your product's photos. Some of these sites even make it a requirement to have nothing on your product's background other than a white image. But remember, the background removal service here at

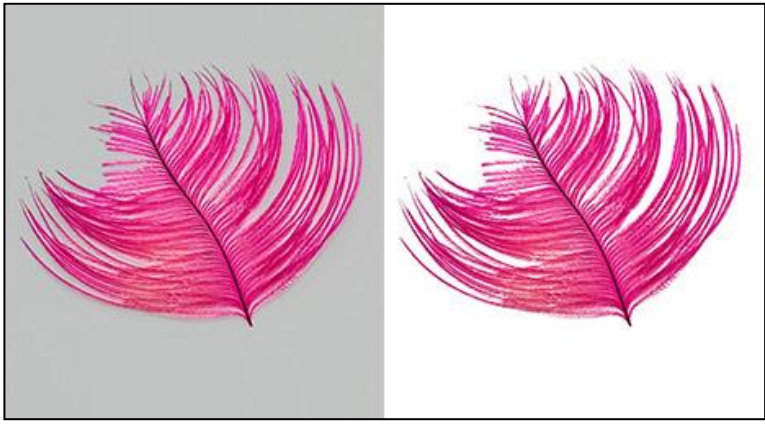

## **Image Masking**

Image masking is a process of using graphic software similar to Photoshop to take an image and put a different background behind it. Image masking can also remove or add different aspects of the photo you're choosing. Image masking is very important when it comes to turning a photo from partly invisible to invisible. Image masking is the best and most simple way to conceal and reveal aspects of the photographs. Our editor's can control the transparencies of your photos to create a look you will love.

## *Drop Shadow*

Our images are a very important way of telling our stories and creating special moments. Since photos are great at visual explanations, they are key to creating the perfect image you've been searching for. With our services at Color Experts India, you won't be let down.

Drop shadow services are meant to create a polished look for your images and used to create a natural feel for your photos. Our services will highlight any part of your photo to leave you in awe. Using our drop shadow services, we can make your images aesthetically pleasing and create the exact look you're going for. Our team can highlight any aspect of your photos to shine a light on any specific object, person, or thing.

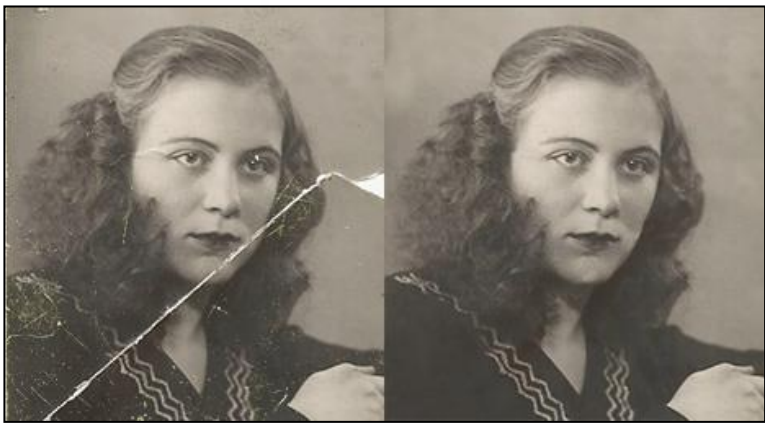

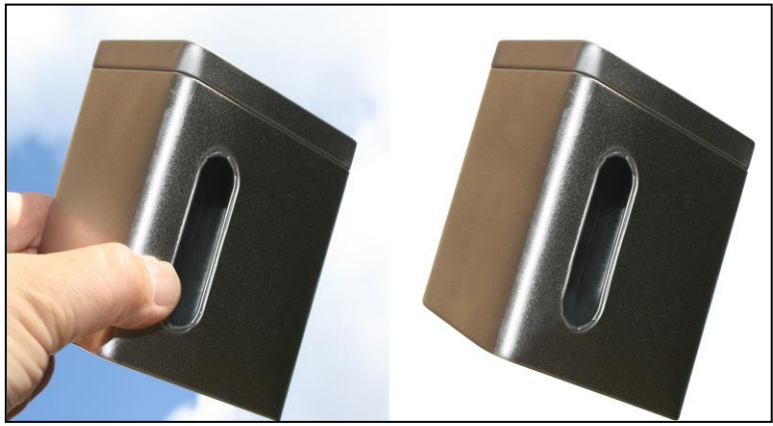

## ***Photo Retouching***

Photo retouching is a process that improves the quality of a photo. Through specific programs, designers modify and improve digital photographs or images to satisfy distinct needs.

Professional photo retouching requires extensive knowledge of photo editing software, coding skills, and patience. Some of the best-known programs are Gimp, Photoshop, Paint Shop Pro, and CorelDraw. But there are many available both for free download or commercial use.

Common photo retouching's are eliminating annoying defects such as red eyes, centering a wrong shot, creating image overlays, photomontages through special filters, creating suggestive effects on images, and much more.

## ***Ghost Mannequin***

Ghost mannequin services are a way of separating the body of a mannequin from a product. This helps to visually see an item of clothing or an item off of a mannequin and onto a clear screen. Using our ghost mannequin services, you can save time and money to complete the look you were going for. Using this service, we can remove a model or mannequin and combine the photos using our post-production processing to help create that lifelike image to truly come to life in a picture. Using the ghost mannequin services can have a lot of benefits for you if you want to showcase an item or a person that has worn your item. If you don't have a person to showcase your item, that's when you can use a mannequin, which is cheaper and can be a time saver. That's when we come in and can edit out the mannequin to showcase your clothes or items. Using our professionally edited services, we can make your products come to life and give you that natural looking appeal you

## ***Color Variants & Color Changing***

Handling a vast variety of customers has made Color Experts India LLC one of the leading companies in the color variants & color changing services. Since 2013, after over eight years of consolidated experience, our studios have provided retouching and editing services to professional's photographers, ad-agencies, and individuals alike globally. Our color change image editing services let any B2B or private transaction reach the ultimate perfection to fully satisfy our customers' needs.

Color variants let entrepreneurs expand their inventory. Increasing the number of colors of existing products can lead to a dramatic increase in sales. However, creating all the media content necessary to fill the related webpages is a waste of time. Our company lets entrepreneurs ignore the gap created by the need for new images and photos. From the simple Photoshop color replace service to more advanced techniques, we provide a quick and efficient way to expand your inventory in the shortest amount of time.

## **Product Photo Editing**

Enhance the images of your business and products to their maximum potential.

The application of digital technologies to photos has radically changed the way we photograph. At the same time, it introduced the ability to retouch digital images effectively and quickly. Today, eCommerce sites can boost the visuals of any product for many purposes, such as to make it more alluring or to highlight its artisanal properties. Here at Color Experts India, we provide product photo retouching services capable of turning any photo into anything our customer's desire.

Advertising agencies need eCommerce image editing services to play up key features or icons. Photography agencies ask us to digitally refine several materials for their photobooks to speed up an otherwise time-consuming project. And on a daily basis, online business owners request our product photo editing services to avoid the overall cost of production of new photos.

## Vector Conversion

Marketers, brand managers, and influencers are among the most demanding customers when it comes to vector conversion services. And we are happy for that to be the case because we take raster to vector services very seriously. There is more than a simple vector tracing service behind a clean and crisp graphics. Our vectorization service makes sure that your image is 100% flawlessly vectorized down to the last unnoticeable pixel.

Color Experts India started to offer vector conversion services in 2013. Our clients had many difficulties converting their rasters to vectors. They wasted too much time. Little details could mess up their entire projects. Even other professional photography studio owners started outsourcing their images when we created the first raster to vector services.

## Why Choose Color Experts India?

- Our services are affordable and accessible to different kinds of clients.
- Our professional editors to deliver our services in multiple styles as per client needs. You can tell your needs or give us an example of the style you want.
- Our professional photo editors have wide knowledge in offering exceptional quality services that exceed the needs of our clients.
- Before we send the ready order, a senior editor goes through it to ensure that it meets our high-quality criteria.
- We have expert retouchers with specialization in different fields. For instance, we have retouchers specializing in eCommerce and photo studio. You should expect a high-quality service offered by a professional knowledgeable in your area of business.
- Our reputation is unparalleled as per the raving reviews of the previous clients. Choosing us means that you select the best company to work for you.
- We don't outsource our services. Your photos will be edited by our professionals who are located in our company.

We don't use your photos without your express authority. When you choose our firm to retouch your photos, you should not expect to see the images in any place.
